

# REVEALED! The 10 things the Galaxy S4 CAN'T do!

Samsung's flagship new mobile has broken cover with countless amazing new features. That's not to say it's perfect...

The phone that'll change your life (a bit)

### Photobombs-away

Both front and back cameras can kill off photobombers thanks to image-blending technology. But it WON'T stop Ricky off *EastEnders* from trying to photobomb you anyway...

### Voice control

You can text while driving thanks to voice-activated tools that can dictate, reply, forward and save text messages. But sadly, it WON'T actually make you a better driver...

### Speaker system

Connect with up to eight fellow S4 owners and the phones can sync and act as a joint wireless speaker system. But it still WON'T drown out the year 10 schoolkids at the back of your bus to work.

### Remote find

An internal infrared diode means it can act as a remote control for your entertainment centre and TV. But it WON'T stop a row with the missus when she wants to switch over to *TOWIE*...

### Tongue tied

The S4 can translate eight languages automatically, making it essential on your holidays. But it CAN'T explain to a Spanish policeman why you're running up and down the Magaluf strip naked at 4am in just a pair of flip-flops.

### Eye phone

The S4 has a built-in retina scanner that scrolls websites as you read them and pauses video when you look away. But it won't be useful to Jason Manford as it CAN'T automatically wipe your web history the moment your missus borrows your phone.

### Friendly chat

The S4's ChatON software takes aim at Blackberry's BBM, offering a free messaging and multiple video call service. But it DOESN'T ban people from using "txt spk", so Tulisa's Twitter is still a no-go zone.

### Big display

Its 5-inch screen is a quarter bigger than the iPhone 5's and displays in gorgeous 1080p hi-def. But it's NOT immune from being shattered during a heavy session.

### Point the finger

You can say goodbye to a dirty screen, as the S4 can be controlled just by hovering your finger over it. But it CAN'T read your mind, so you can forget about fooling your mates with some mind-bending Derren Brown-style tricks.

### Face is a picture

The phone's dual cameras ensure you're included in every photo you take with the main snapper. But it WON'T include any software to make you better looking - particularly bad news for the Thumb Man...

All new secrets!

# Alan Partridge movie!

Earlier this month, we brought you the first look at Alan's movie outing. Now the first trailer's landed. Here's what you need to know...

The teaser trailer shows Alan in his radio studio, suggesting potential titles for his big-screen debut. These include *The Norfolk Fracture*, *Gun Bird*, *Hectic Danger Day*, *Chap Of Steel*, and *Colossal Velocity*.

The movie will feature Alan's *Mid Morning Matters* co-DJ Sidekick Simon, who gives away that the movie will include Norwich's famous son being in a siege at a radio station.

Sidekick Simon reminds Alan the film will have "action, fun, tension, danger". Partridge is quick to remind everyone there'll also be "heavy kissing and guns".

## ALAN PARTRIDGE IS IN ALPHA PAPA

They eventually settle on *Alpha Papa*, which is Alan's initials in the radio alphabet, although this goes against Alan's personal vote for *Colossal Velocity*.

Alan Partridge Is In *Alpha Papa* hits cinemas on 7 August. Watch the teaser trailer on ZOOToday.com now. Cashback!
